

CONTENTS

- 3 A Three-Step Procedure for the Modelling of Human Diarthrodial Joints**
R. Franci, V. Parenti-Castelli and N. Sancisi
- 13 Workspace Enlargement Merging Assembly Modes. Application to the 3-RRR Planar Platform**
Erik Macho Oscar Altuzarra Victor Petuya Alfonso Hernandez
- 21 Lot Size One in the Mass Production and Precision Assembly of Cylinder Locks**
Wolfgang Mann, Georg Peschl, Arne Sieber and Christian Wögerer
- 29 Calibration and Testing Issues of The Vision, Inertial Measurement and Control System of An Autonomous Indoor Quadrotor Helicopter**
Laszlo Kis, Zoltan Prohaszka and Gergely Regula
- 39 Fractional-Order Derivatives and Their Application to the Position Control of Robots**
L. Bruzzone G. Bozzini
- 45 Robotics Techniques for Data Acquisition in Underwater Archeology**
G. Conte S. M. Zanolì D. Scaradozzi A. Caiti

next number scheduled titles:

Dynamic And Energy Analysis of a Production System of Filament Wound Elbows

G. Dionoro, P. Buonadonna and A. Tronci

Design and Simulation of Cassino Hexapode Walking Machine

G. Carbone, M. Suciù, M. Ceccarelli and D. Pislà

Robot Assisted Laser Scanning

C. Rossi, S. Savino and S. Strano

Evaluation of Feasibility of Mechanical Harvesting of Myrtle Berries (*Myrtus Communis* L.)

F. Gambella and F. Paschino

Nonlinear Elastic Characteristic of Magnetic Suspensions through Hilbert Transform

E. Bonisoli
