

CONTENTS – Special Issue for IFIT 2018

- 1** **Recent achievements within IFToMM ITALY on mechanism and machine science**
G. Carbone and A. Gasparetto
- 3** **A state-of-the-art review on torque distribution strategies aimed at enhancing energy efficiency for fully electric vehicles with independently actuated drivetrains**
A. Sforza, B. Lenzo and F. Timpone
- 17** **Fuzzy logic controller for active suspension systems of intelligent vehicles**
N.I. Giannoccaro, G. Reina and L. Rizzo
- 31** **Evaluation of vehicle lateral dynamic behaviour according to ISO-4138 tests by implementing a 15-DOF vehicle model and an autonomous virtual driver**
M. Perrelli, F. Cosco, G. Carbone and D. Mundo
- 39** **Vibration control of flexible beams manipulated by industrial robots via a stochastic AR-based control system**
S.N. Aspragkathos, J.S. Sakellariou, P.N. Koustoumpardis and N.A. Aspragathos
- 49** **Energy efficiency in a 4-DOF parallel robot featuring compliant elements**
L. Scalera, G. Carabin, R. Vidoni and T. Wongratanaphisan
- 59** **Burr hole craniotomy on cadavers for the design of teleoperated robot: motion specifications and interaction forces**
T. Essomba, J. Sandoval, M.A. Laribi, C.T. Wu, C. Breque, S. Zegloul and J.P. Richer

CONTENTS – Regular Issue

- 65** **Control of fluidic systems based on under-actuated damped architectures two application examples**
A. Di Lallo, M.G. Catalano, M. Garabini, G. Grioli, M. Gabiccini and A. Bicchi
- 77** **Designing sliding mode observer for estimation of euler and longitudinal-lateral flapping angles in hover flight motion of a helicopter**
M.R. Homaeinezhad, M. Youshi, A. Foroughimehr and B. Rashidi
- 91** **Integrated health monitoring for robust actuation system of uav primary flight controls**
A. De Martin, G. Jacazio and M. Sorli
- 105** **New synthetic fluid dynamic model for aerospace four-ways servovalve**
M.D.L. Dalla Vedova, P.C. Berri, C. Corsi and P. Alimhillaj
- 113** **Modelling and control design of a novel robotic membrane**
V. Franchi, G. Di Rito, R. Galatolo, F. Cannella, D. Caldwell and G.G. Muscolo
- 123** **Force analysis in a three point-hitch mechanism of category 2 for agricultural tractors**
T. Raparelli, G.Eula, A.Ivanov and G. Pepe
- 135** **Simplified models for mechanical transmission efficiency with opposing and aiding loads**
P.C. Berri, M.D L. Dalla Vedova, P. Maggiore and A. Manuello Bertetto
- 141** **Design and experimental characterization of a novel subactuated mechanism for robotic finger and movable palm**
F.J. Espinosa-García, M. Arias-Montiel, M. Ceccarelli, G. Carbone and E. Lugo-González

Next issue titles will be from the selected and awarded papers of:

RAAD 2019

28th International Conference on Robotics in Alpe-Adria-Danube Region

Kaiserslautern, Germany
June 19-21, 2019
